	A-Data Technology Co., Ltd. www.adata-group.com Hall 21 E56	Turbo CF350X	Turbo Series CF 350X supports dual-channel data transferring and UDMA 0-5 mode as well as MDMA 0-4 mode of high-level digital cameras. Under the Ultra DMA mode 5 and IDE interface, the write speed can reach up to 47MB/sec. In addition, users can store up to 1,500 photos of RAW file in the high-capacity memory card and do not have to worry about inadequate space for photos. Using original SLC flash memory (Single-Level-Cell), Turbo CF350X consumes less energy with read/write speed dramatically boosted. With the advantages of stability and high capacity, users can enjoy the pleasant feeling of non-stop shooting and continuous filming.	
		XPG DDR3 2133X v2.0	A-DATA proudly introduces the latest cooling solution for extreme performance X Series memory modules. A-DATA's X Series version 2.0 includes 4 types of cooling solutions* - active cooling, passive cooling, water cooling, and liquid cooling. You don't have to remove heat spreaders and buy an after market ram module cooling solution, you have them all here! With new X Series version 2.0 high performance modules, you have total control of your high performance memory modules by selecting your favorite cooling solution.	
	AIPTEK International Inc. www.aiptek.com.tw Hall 26 A37	PocketDV AHD Z700	The first 1080p high definition digital camcorder with the sport car design insight in the world. The sleek shape; the speaker grill represent the engine grill, ready for a racing game; the hot key switch represent the gear lever, allow you to accelerate immediately, to shift the frame per second under different environments. Record high definition 1080p video, quality of video is 4.5 times better than DVD and much more beautiful to playback in the HDTV. 3X Optical Zoom lens and auto focus lens together with electronic image stabilization allow you to neutralize the camera shake.	
		Mona Lisa	Digital photo frame could display digital photos. However, how about the memorized vintage old photo? If the old photo were damaged by accident, what could remind us of the past time? Mona Lisa equipped with 5 mega pixel and auto focus camera to recapture, copy and digitalize your cherished memories. Without using computer, digital camera and scanner, recapture and digitalize the old printed photo easily through simple one click. With the built-in 1 GB memory and battery, you could preserve maximum 3,000 photos.	
	ASUSTek Computer Inc. www.asus.com Hall 26 D39	External Slim Bluray Combo SBC-04D1S-U	ASUS External Slim Bluray Combo SBC-04B1S-U offers revulotionary technological innovations with low power consumption, high capacity, efficient and thermal design. This drive requires no power adapter. The SBC-04B1S-U sends out bright and dazzling blue rays. User can control the light luminance through software. Combining the function of software and hardware, SBC-04B1S-U support advanced video enhancement technologies that deliver unsurpassed quality for DVD movies and its disc encryption technology allows user to protect files with a password.	
		LCD TV 42VW1	● 120Hz Motion Track Technology ASUS 120Hz Motion Track Technology creating a refresh rate of 120 frames per second and calculating moving object precisely, eliminates motion blur. ● ASUS Splendid Pro Engine Splendid Pro Engine can upgrade SD picture to HD quality, no matter what kind of video sources can present perfectly in 42VW1. ● Delux Audio Performance Adopt Dolby Prologic II technology, processing two-channel audio into five-channel of full-bandwidth surround sound, which builds a virtual cinema in your home
